

## What's been happening...

### Take a look back at the first half of term 4!

We have had a fun filled start to term 4. We were lucky enough to join the Boronia Heights Night Market and meet all of the wonderful family and friends of our amazing community. We had a great night talking to everyone and sharing our knowledge of OSHClub.

In service we have had the privilege to work with our children to develop new and nutritional menus including, homemade pizzas, dip, fruit and veggie platters and creating our own smoothie bowls just to name a few. With children researching more recipes for us to try!

Our children had been very excited for Halloween, so we spent the two weeks leading up to Halloween creating a huge Halloween banner, making mini spiders, ghosts and even pumpkin origami. The children were thrilled to learn that we were running a Pupil Free Day program on Halloween!! We spent the day creating edible spider webs, scary monster cupcakes and playing Zombie tiggly!

This term we established with the children, that they wanted to get more hands on in the kitchen with helping prepare and cook food. We took on this information and are running two cooking clubs on a Monday and Friday afternoon, with the hopes to add in a breakfast club soon! We have also decided to run Science Club where children have the opportunity to run and interact with different Science experiments!

We have loved everything so far this term and are super excited as we look towards the end of the year and Christmas!

## Coming Up

Nov  
7th

### A Taste Of Europe Club

We are making our own Hummus

Nov  
8th

### Science Club

Volcanic Eruptions

Nov  
11th

### Street Eatz

We will be making Pho

## Club News

### Club Fomo

We have had so much fun in the first week of our Club Fomo.

Our Street Eatz club made Brilliant Bahn Mi where children worked alongside staff to cut, prepare and cook all ingredients, including plant based chicken strips (with tasted pretty good!).

Science Club had a ball with our Colour Madness experiments! We made walking water and made the colour drain from skittles!

A taste of Europe, had children blind tasting different foods that originated from Europe! Children had to guess what foods they were trailing!

## Special Announcements

### Donations

We are constantly looking to improve our resources! If you have any games, craft supplies or costumes that you are thinking of donating, please feel free to reach out to us and drop them off!

## Quality Area Reflection

### Physical Environment

Physical Environment plays an integral role in a child's learning. We are focusing on the cleanliness of our room, storerooms and kitchen to ensure the best possible space of our children to belong to.

We are in the process of designing new displays to showcase the work of our children and bring more vibrancy and colour into our room!

Pictures to come next newsletter!
